Feel free to contact me if you have any question. Shipping Worldwide with tracking. For all shipments I will immediately report the track number to track the movement of parcels to the addressee. Standart postage shipping AirMail from Russia to Europe usually takes 10 and up to 25 days. Delivery of goods to other countries AirMail from Russia may take 15 and up to 45 days. Please be patient. Russia does not have direct air links with some countries. Therefore delivery parcels to Australia, Canada, Singapore, Brazil perhaps still other can be 45 days or more. I dispatch goods in 12 days after payment and tracking number will be provided. If you have any question ask! Thank you for understanding and good luck. WARNING The outbreak of the virus around the world creates unprecedented difficulties for buyers and sellers. Due to the reduction restriction of air and other communications between countries and sometimes within States, there may be delays in the delivery of parcels to the addressee.

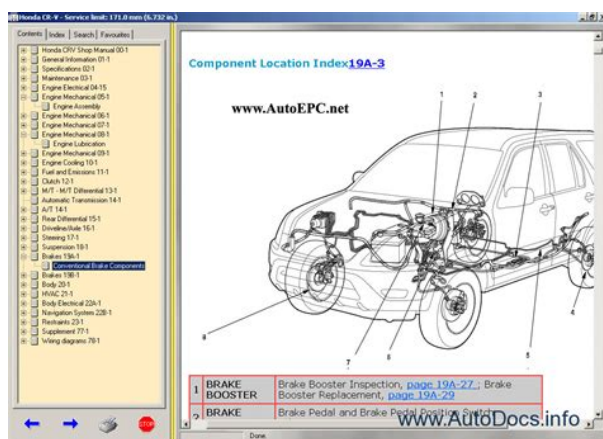

I still send all products only by air mail with a tracking number provided, but I cannot guarantee fast delivery of the product in these terms and conditions. Please be patient. I hope for your understanding in case of delayed delivery of your item sent during this period. In addition, I remove the possibility of returning the product. Read the description and carefully look at the photos when choosing a product for purchase. These charges are the buyers responsibility. Please check with your countrys customs office to determine what these additional costs will be prior to bidding or buying. Super high amount of views. 0 sold, 1 available. I expect this post will typically be found by people searching for specific things listed here. I'll add things as I get them. You can download WinImage and use it free for 30 days, plenty of time to make copies of, or extract files from, floppy images downloaded here. But I strongly suggest registering your copy — it is a useful program and worth supporting. It contains assembly and adjustment instructions, a parts list and exploded view, and very brief instructions on use of the machine. It doesn't have information on specific exercises done with the machine. Their manuals typically don't have a brand name as is true of many Chinese knockoff brands. I sold quite a few computers built with these motherboards — they were cheap and fast. I still have one which I'm planning on putting on eBay once I get the dead BIOS battery replaced. Here is the manual for it It is WinImage format floppy image 1.44 MB, zipped so I could upload it. They tried very hard to look legit. These were very common in very many generic versions. I think driver disks are pretty much interchangeable. It took a while but I finally got a complete copy scanned.

Here it is CNet sold a lot of stuff back in the day, and it was pretty good for cheap hardware. It's probably a design used by many offbrand manufacturers. Hint the manual doesn't say CNet anywhere. Anyhow, here is the manual It has a tiny instruction sheet which you've probably lost, and it's sufficiently nonobvious how it works that you need the instructions every time. Here it is An eBay listing for a copy of this catalog says it is from 1952, but I suspect it may be from around 1956. In any case, it's old. If all you want to do is look at it, here you go The one I have doesn't seem to have a model number, so you'll have to look at the pictures in the manual to see if it is like yours. It's not easy to figure out how it works without the manual. There is a reference to a driver that provides such support "Bastech driver". I don't have one and don't know where to get one. Google will probably help. It has drivers for most of the motherboard chipsets of the era and would probably work for most motherboards based on those chipsets. I would have uploaded a zip file of it but WordPress doesn't allow them. The Internet Archive is a great and growing resource for obsolete software of all kinds. Chipsets are listed with the Bektronic "BEK" motherboards that use them following each group of chipsets. A ew other thigs on the CD are at the bottom of the list. But for anyone who still is, here's the manual. Mine is about to be recycled as the battery is dead and I have much better, newer drills. I suspect no one is using these any more. For example, there is not a complete parts list — you're not expected to fix them, just throw them away. I am selling mine on eBay because I bought a Ryobi one. Such details would apply to many modems of the era. Learn how your comment data is processed.
